M/s R K Batra Transport Co

Surya Shakti Vessels Pvt. Ltd.

Surya Shakti Vessels, our flagship company was established in 2001 for the manufacture of LPG Cylinders. SSVPL is one of the largest leading Cylinder manufacturing company in India and supplies cylinders to fortune 500 public Sector LPG Marketing companies i.e IOCL, HPCL & BPCL and also to the majority of LPG Marketing companies in private sector all over India. It exports cylinders to various countries in Asia, Africa, MENA, Latin America and has an experience of manufacturing over Five million LPG cylinders till date. At present the installed manufacturing capacity is around 1.2 Million Cylinders per year. SSVPL is approved by the U.S. Department of Transportation for DOT Standards and Bureau Veritas to manufacture Cylinders as per TPED guidelines. It also manufactures Cylinders as per customer design specifications, code specifications and quality standards.

SSVPL has also been engaged into the manufacturing of Valves for LPG Cylinders and other applications since 2004 under various national and international standards. The company has a strong technical strength backed by Engineers with exquisite skills, advanced machines/Testing equipment and a polished computer numerical control processing centre.

Quality

Today, Quality Planning, which is the process of identifying customers and defining their needs and designing products and services is an integral part of Quality Management.

Quality Management is positioned in the heart of the company's activities in order to satisfy all the stakeholders as well as sustain the company's experience and expertise. Our Quality Policy is effectively communicated across the entire organisation together with a complete picture of customers opinion about our products and services for strategic decision making. The Quality of SSVPL products differentiate them from those of other products in the market. We see quality as our success factor, our way towards excellence, and we promote it whenever the need arises.

Our commitment to "**QUALITY:OUR PRIORITY**" is further reflected by the fact that our manufacturing practices are approved for below given certifications to meet the needs of our customers and other stakeholders while meeting statutory and regulatory requirements both at the local and international levels.

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2015

Our focus on quality never-stops as the quality train continues on its journey.
